NOTE: Enabling JavaScript and a stable broadband connection are required.

ABOUT THE COURSE

This online course is ideal for anyone looking after infants and children. In order to achieve the full qualification, you must also complete the practical elements and assessment in a classroom.

The HSE supports the use of eLearning for first aid refresher training. To be able to give first aid a person must have a practical training qualification. The qualification expires after 3 years. However, 3 years is a very long time to remember all the important details of the training, therefore online refreshers are an excellent way to bridge the gap between practical sessions.

AREAS COVERED

The modules cover the theory elements of the Level 3 Paediatric First Aid qualification. These modules include:

- Roles and responsibilities of a paediatric first aider
- Assessing an emergency situation
- Dealing with a child who is unresponsive, choking or has external bleeding
- Dealing with a child with a suspected bone fracture or dislocation; head, neck or back injury
- Dealing with a child with a condition that affects the ears, eyes and nose; burns or scalds, an acute medical condition or sudden illness; shock or a minor injury
- Dealing with the effects of extreme heat or cold
- Dealing with a child who's had an electric shock or been poisoned
- Dealing with a child with anaphylaxis

ASSESSMENT AND CERTIFICATION

Candidates will be assessed by a series of multiple-choice questions. Subject to satisfactory completion, candidates are given access to an electronic Highfield quality endorsed certificate of completion, which they are able to print.
