NOTE: Enabling JavaScript and a stable broadband connection are required.

ABOUT THE COURSE

COSHH stands for 'Control of Substances Hazardous to Health'. COSHH is a set of regulations put in place to protect workers from ill health when working with specific substances and materials.

Hazardous substances can affect anyone within the workplace, not just those who handle them regularly.

This course is designed to give workers knowledge of the health risks surrounding work with hazardous substances, including how to undertake a COSHH assessment by identifying the risks and the control measures needed, and ensure that they understand how to work safely with hazardous substances.

AREAS COVERED

The modules of this short course include:

- Introduction to COSHH
- Health hazards and occupational risk
- Identifying hazardous substances
- COSHH risk assessment and control measures
- The Control of Substances Hazardous to Health Regulations

ASSESSMENT AND CERTIFICATION

Candidates will be assessed by a series of multiple-choice questions upon the completion of each of the modules. Subject to satisfactory completion, candidates are given access to an electronic CIEH quality endorsed certificate of completion (in PDF format), which they are able to print.
