NOTE: Enabling JavaScript and a stable broadband connection are required.

ABOUT THE COURSE

The Health and Safety Executive (HSE) statistics show that falling from heights cause the most fatal injuries in the workplace.

The Working at Height Regulations 2005 requires employers to ensure that a sufficient risk assessment is carried out so that all potential work at height risks are effectively identified, controlled and managed.

This online course is suitable for anyone who works at height and will not only help you satisfy health and safety regulations but will also go a significant way to ensuring the safety of your staff when they are working at height.

AREAS COVERED

The modules of this short course include:

- Introduction to working at height
- Employers responsibilities
- Planning work
- Risk assessment steps
- Reducing and controlling the risks
- Using ladders and stepladders

ASSESSMENT AND CERTIFICATION

Candidates will be assessed by a series of multiple-choice questions upon the completion of each of the modules. Subject to satisfactory completion, candidates are given access to an electronic CIEH quality endorsed certificate of completion (in PDF format), which they are able to print.
