Working at Height

Course Aim

The aim of the course is to provide your employees with the necessary information they need to be able to successfully deal with working at height risks and control measures.

It will also help them to understand how to select appropriate equipment in accordance with legislation.

Who Should Attend

This course is ideal for anyone whose job involves working at height. This includes professions such as building contractors, telecom engineers and self-employed window cleaners.

It also includes those involved in activities such as changing light bulbs, stacking shelves and loading and unloading vehicles.

Course Length

Half day

Entry Requirements

Candidates are not required to have any prior knowledge or qualifications to enable them to attend this course.

Accredited By

This is a non accredited course.

The Content

- An introduction to Working at Height legislation.
- Employer and employee duties and responsibilities.
- Identifying working at height activities.
- The cause of working at height accidents.
- How to work at height safely
- Risk assessment on working at height activities.
- Reducing and controlling the risks evolved.
- Working at height equipment.
- The control of contractors.

The Benefits

By completing the course, your employees will be aware of the dangers of working at height and will know how to manage and control associated risks.

They will understand the responsibilities of both the employer and the employee under the Working at Height Regulations.

On returning to the workplace, they will be able to undertake risk assessments and follow the correct safety procedures. In addition, they will use the right access equipment to ensure they carry out their work safely and to prevent the risk of falls from height.

You will be able to demonstrate compliance with legislation and prove due diligence through training records and certificates. In addition, you, your business, your employees and your customers will be protected.

Working at Height
