ABOUT THE COURSE

With so many people in the workforce now embracing home working, employers must consider the challenges of supporting their home working staff to continue to work safely, just as they would with any employee.

Equally, home workers must take care with their own health and safety. If you're an employer, hybrid or home working employee then this course is for you.

This course is packed with current information and engaging activities, looking at what home working is, risk assessments and controls, safe use of display screen equipment (DSE) and mental health and stress.

AREAS COVERED

The modules included in this course include:

- What is home working?
- Supporting home workers
- Risk assessment
- Electrical equipment in the home
- Conditions for home working
- Display screen equipment
- Employer and employee responsibilities
- Stress and mental health
- Communication

ASSESSMENT AND CERTIFICATION

At the end of the course there is a multiple-choice test. Candidates will receive a Highfield e-learning completion certificate, which is downloadable upon successfully finishing the course.
